EXPRESSPLUS SPEED DISCS

FarmChief has worked the land for generations and we plan to be here for many more. Our high-spec implements provide farmers and contractors around the country with the best ways to cultivate, sow, harvest, manage nutrients and generally keep things going to make the most of New Zealand's potential.

9 REASONS TO CHOOSE EXPRESSPLUS SPEED DISCS

1) EFFICIENCY – With ExpressPlus Speed Discs you can do in one pass what you would've usually done in several. And often with three separate implements. So there's less gear. And it's quicker – speeds along at up to 16km/h.

2) AFFORDABLE – ExpressPlus Speed Discs will easily return your investment in time saved, fuel saved and reduced maintenance.

3) EASY OPERATION – If you can drive a tractor, you're good to go. We don't set out to make things difficult around here, so even entry-level staff can do a great job with this implement – the only hydraulic adjustment is depth.

4) OPTIMUM ANGLE – The unique "optimum angle" disc design gives greater precision and accuracy. If the machine is level, pulling straight and working a minimum of 50mm deep, every speck of soil is moved eliminating any thoughts of dips or hollows, thanks to this optimum angle.

5) LOW H/P OPERATION – Super effective operation means you don't need a big tractor. 3m ExpressPlus Speed Discs will be happy with a 90h/p tractor and the 4.5 m with a 120 h/p. Less fuel, more economical.

6) EXTREMELY LOW MAINTENANCE – A robust construction and sealed longlife bearings which have a 5 year warranty. The only thing you'll be looking at is replacing the discs after five years, or so.

7) "CAMBRIDGE FINISH" – The option of extra implements – rippers up front and rollers at the back – sets your seed bed up, even in the toughest country, all ready for drilling.

8) MOUNTED OR TRAILED – one size doesn't fit all when it comes to farming and cultivation systems, so we give you the options.

9) FREE ON-FARM DEMONSTRATION – (maybe we should've put this first) Just call FarmChief and we'll arrange for you to have ExpressPlus Speed Discs delivered, to your property, to test behind your tractor.

EXPRESSPLUS SPEED DISCS

Used for primary and secondary cultivation, ExpressPlus Speed Discs are unequalled in performance after winter feed, for stubble incorporation, and to break-up paddocks after compaction. And they do it twice as fast as conventional discs.

- ▶ Multiple rear roller options to suit needs
- ▶ Unique 'optimum angle' disc
- ▶ Combination options for 1 pass job
- ▶ SKF sealed bearings
- ▶ 90-180 HP rated
- ▶ 3-6metre working width

MODEL	WORKING WIDTH	NO. OF DISCS	KG PER DISC	FOLDING/FIXED	WEIGHT APPROX.	HP
3000	3.0m	24	75kg	Mounted/Fixed	1800kg	90+
3000 T	3.0m	24	83kg	Trailing/Fixed	2000kg	90+
4500	4.5m	36	100kg	Trailing/Folding	4000kg	120+
6000	6.0m	48	85kg	Trailing/Folding	5100kg	160+

”

BEN PANKHURST, GRETA VALLEY

They work very well across all soil types and even in steep and rocky terrain. They're very versatile and they've changed the way we work the ground. They're more efficient than the heavy discs and they're cheaper for the farmers. There are fewer hours in the paddocks and, from our point of view, we get more ground covered, there's less maintenance and they're cheaper to run."

- Owner of Express 4500 Speed Disc

> FEATURES

When you want to cut through the work, ExpressPlus Speed Discs are unsurpassed. Available in widths from 3M to 6M, they are used after ploughing, or for stubble incorporation or even sprayed out grass paddocks, working at speeds of up to 16km/h. They save time and, importantly, do the job better.

The unique “optimum angle” disc design gives greater precision and accuracy for cultivating, while other features include greater protection for bearings making sure everything works exactly as it should. No need to grease the tough SKF sealed bearings.

EXPRESSPLUS 3000 SPEED DISCS- 3PTL

The ExpressPlus 3000 Speed Disc is a 3m mounted machine, featuring two sets of 560mm discs which are angle-mounted, followed by a set of heavy-duty tines and a rear roller of your choice. They are ideal for working up stubble, ex winter feed paddocks or even sprayed out pasture.

- ▶ Multiple rear roller options to suit your situation (packer, u-box, or cage)
- ▶ Cheaper fast model
- ▶ 90HP required
- ▶ Hydraulic depth adjustment

EXPRESSPLUS 3000 SPEED DISCS- TRAILED

9

Different to the 3ptl ExpressPlus 3000, the ExpressPlus 3000 is a trailed unit, and it only comes with a tyre roller. It can be used in combination with the ExpressPro Pre-Ripper, which is ideal for rolling country or for pugged paddocks where ripping is required.

- ▶ Trailed 3m unit
- ▶ Combine with ExpressPro Ripper for one pass results
- ▶ 90 HP required, 120HP with ripper

EXPRESSPLUS 4500 SPEED DISCS

The ExpressPlus 4500 Speed Disc is ideal for the larger farmer or contractor, trying to cultivate fields faster and more efficiently. This machine is ideal for working on rolling country or in combination with Pre-Rippers and/or Airseeder, furthermore towing a hydraulic folding roller behind is a great way to level off the paddock, doing a one pass job.

- ▶ Multiple rear roller options to suit needs
- ▶ Combination options for 1 pass job
- ▶ 140 HP required
- ▶ 6mm disc blade
- ▶ Optional depth wheels and leveling paddles

EXPRESSPLUS 6000 SPEED DISCS

Covering more ground than the 4500 the ExpressPlus 6000 Speed Disc is the ultimate machine. Made for the larger HP tractors, weighing over 5 tonne makes this unit a heavy duty machine.

- ▶ Multiple rear roller options to suit needs
- ▶ Combination options for 1 pass job
- ▶ 160 HP required
- ▶ 6mm disc blade
- ▶ Optional depth wheels and leveling paddles

EXPRESSPRO PRE-RIPPER

The ExpressPro Pre-Ripper and the ExpressPlus Speed Discs are a formidable combination - available in three widths, 3m, 4m and the 6m. The combo is ideal for pugged paddocks or when deep ripping is required. The Ripper features this unique twisted shin which is great for burying trash, it helps minimize passes, and can be mounted on the front of your tractor as well.

- ▶ Auto reset
- ▶ 600mm working depth
- ▶ 500mm tine spacing
- ▶ Optional wing feet
- ▶ Can be front mounted
- ▶ Ideal for breaking up the pan.

”

DAVID & SALLY MAVOR, LISMORE

Used mostly for working-in crop after winter grazing. He says the advantage of the implement is that it deep rips the soil while working the top soil at the same time. “Two or three passes and it’s ready for drilling into spring cereals.” “Turn-around is everything because time is important. This is helping us achieve that. The one cultivator, effectively does two jobs. “We’ve cultivated 100 hectares with it, in one season, and it’s performed as we expected.”

“We’re really happy with it.”

- Owner of ExpressPlus 3000 Speed Disc & 3m ExpressPro
