MOORE UNI-DRILL

DIRECT DISC DRILL

farmChief. Implements for the best farmers in the world.

NZ'S MOST EFFECTIVE DIRECT DISC DRILL.

Time efficient & easy to operate, the Moore Uni-Drill is ideal for oversewing and drilling into stubble or cultivated ground. The perfect choice for farmers and contractors who are looking for the accuracy and finish of a disc, without the elaborate triple disc design of other direct drills.

The complete machine for high-performance in New Zealand conditions. Staggered, narrow row spacing allows for great trash clearance, along with thick, fast crop establishment. Weeds are put to bed, allowing for an excellent strike.

Choose a trailed or mounted machine, with either 32 rows (with 90mm spacing) or 24 rows (with 125mm spacing).

NARROW ROW SPACING

Narrow 90mm row spacing guarantees thick, fast crop establishment, weeds are put to bed, allowing for an excellent strike. There is also a spacing option of 125mm on a 24-row unit.

UNIQUE GUTTLER ROLLER

The Guttler packer roller is very unique, made up of two cast iron prisma rings, one 45Ø, the other 50Ø. The larger ring runs on the inner shoulder of the smaller ring creating a self cleaning action, which is great in sticky situations. The roller also has a smoothing effect, which is great for crop paddocks and gentle on pasture, leaving a neat finish.

SPECIAL DISC DESIGN

Mounted on a five-degree angle, the 410x5mm disc blades, work along with the Tungsten carbide tipped coulters to ensure quick and accurate seed placement. The soil is sliced opened, seed is placed, followed by the rear Guttler roller that ensures even seed to soil contact.

MODELS TO SUIT YOU

MODEL	WORKING WIDTH	WEIGHT	NO. OF ROWS	ROW SPACING	HP REQ
UNI 24R MOUNTED	3.0m	2200KG	24	125mm	110+
UNI 24R TRAILED	3.0m	2800KG	24	125mm	110+
UNI 32R MOUNTED	3.0M	2300KG	32	90mm	110+
UNI 32R TRAILED	3.0m	3000KG	32	90mm	110+

TESTIMONIAL

“We drilled 60ha of Kale with it in November and drilled another 30ha of grass ex barley straight into cereal trash. The establishment of the kale with a double spray process into ex-pasture, coupled with irrigation meant it worked very well. It’s the first Airseeder I’ve owned, and I’ve been very impressed with the accuracy and ease of use, so that’s been great.

“I was also impressed with the rear roller, there was some marginal conditions where it was quite wet, however the self-cleaning function of the roller really did the job and meant we didn’t block up at all.” - *David Mavor - Dairy Farmer, Lismore, Canterbury | Moore Uni Drill*
